

# UM POP FILTER

Protective filter for clear voice recordings with CHERRY UM microphones

Models may vary from the image shown

A pop filter is essential to reduce plosive sounds when pronouncing words with P, T or K, for example. The CHERRY UM POP FILTER helps you to not only spend less time and effort in the post-production of audio recordings, but also protects the capsule of the microphone from moisture caused by saliva, keeping it intact for longer.

The CHERRY UM POP FILTER was designed to meet the exact requirements of the CHERRY UM MIC SERIES (CHERRY UM 3.0, CHERRY UM 6.0 ADVANCED, CHERRY UM 9.0 PRO RGB) and can therefore be attached without any problem to any of the three microphones: Simply attach it between the microphone and the stand and tighten with the help of a small knob – and you're ready to start recording. The sleek design does not detract from the elegant look of the microphone.

## FUNCTION AND PERFORMANCE

- Filters out plosive sounds that are noticeable as pops or hisses when pronouncing letters such as P, T, and K
- Less post-production of recordings required
- Perfect supplement to the USB microphones in the CHERRY UM MIC SERIES
- Assembly is child's play: Simply tighten using a small knob
- Protects the microphone capsule from moisture, thereby ensuring a longer service life

## TECHNICAL DATA

Weight main product:	27 g
Dimensions product without packaging:	95 mm x 88 mm x 150 mm
Weight of product incl. packaging (g):	73 g
Dimensions product incl. packaging:	156 mm x 87,5 mm x 97,5 mm
Content of master carton (pieces):	40
Weight of master carton incl. content:	3,900 g
Dimensions master carton:	420 mm x 465 mm x 330 mm
Storage temperature:	-5 °C - 55 °C
Working temperature:	0 °C - 50 °C
Scope of delivery:	UM POP FILTER
